

Aligning Recruitment Levers with OECD Guidance: TFETP Design Alignment & Portability Appraisal

Document-based comparative policy analysis

PRESENTER:
Shun Ching Hsieh,
Dept. of Education,
NCCU

政大
NATIONAL CHENGCHI UNIVERSITY

Why this matter?

01.
Teacher shortages are rising across OECD systems, threatening quality and equity

02.
Guidance exists but is rarely put into practice

Figure 1.1.
Rise in reported teacher shortages hindering instruction, according to PISA (2015-2022)

Between 2015 and 2022, the share of students whose principals reported them **grew from 29% to 47%** on average across the OECD

RQ

- ➔ RQ1: To what extent does TFETP align with OECD/international guidance?
- ➔ RQ2: Which levers are portable across legal, fiscal, and administrative preconditions?
- ➔ RQ3: What implementation gaps exist?

Contribution: Design alignment + portability, not outcomes

Document-based qualitative policy analysis

publicly available TFETP materials official portal, MOE press releases...

Coded six policy levers with dual ratings: Alignment and Portability

Systematic coding across six predefined policy dimensions; dual-axis ratings for Alignment (High/Partial/Low) and Portability (Legal/Fiscal/Administrative preconditions)

Reliability via dual-pass intra-rater check and triangulation with official sources

through dual-pass intra-rater coding and triangulation with authoritative government sources

Method

compensation

Workload pay

Bonuses

**Insurance &
protections**

**Relocation
supports**

**Onboarding /
induction**

Evidence base (what we reviewed)

- ➔ TFETP portal: eligibility, job, benefits, forms. MOE press. K-12 EA legal hub. ROC mission notice

- ➔ Comparator frameworks: OECD, UNESCO, World Bank SABER.

- ➔ Country exemplars: UK STPCD and ECF. Singapore Teacher Growth Model.

more info of on **Appendex A**

Where **TFETP** is strongly codified?

01.

Compensation:
Transparent salary bands
and listed benefits
published on official pages.

Shows qualification and experience bands, plus enumerated benefits.

04.

Workload pay: Overtime or
extra instructional periods
remuneration is referenced as
payable beyond base load.

Indicates existence of rules for additional teaching periods.

02.

Bonuses: Year-end and
renewal-linked bonus
structure described in public
materials.

Criteria and timing referenced at program level.

05.

Insurance and protections:
Health and labor insurance
coverage publicly stated.

Coverage type and program responsibility identified.

03.

Relocation supports: Economy
airfare, relocation allowances,
and housing reimbursement
caps specified.

Includes eligibility notes and reimbursement rules.

Gaps and blind spots

➔ Induction/mentoring at school level

- No explicit public codification of school-level induction or mentor entitlements, duration, funding, or ratios in TFETP pages reviewed.
- Implication: Onboarding is referenced nationally, but site-level support is not specified as an entitlement.

➔ Targeted incentives for hard-to-staff placements

- No explicit, written differentials for shortage subjects, rural/remote placements, or priority schools were found on public TFETP pages reviewed.
- Implication: equity targeting may rely on ad-hoc arrangements rather than codified levers.

➔ Implementation fidelity and retention outcomes

- No periodic public reporting of implementation fidelity, attrition/retention rates, or differential impacts by placement context located in the public corpus.
- Implication: limits learning and course-correction, and weakens portability claims.

➔ Grievance and audit processes

- TFETP pages reviewed do not detail claims pathways, timelines, appeal bodies, or audit trails linked to entitlements.
- Implication: enforceability is harder to evidence from public sources.

Portability framework and scoring rule

Portability preconditions

- Legal: statutory authority or regulatory fit
- Fiscal: predictable, sustainable budgeting
- Administrative: clear procedures, roles, and accountability

Scoring rule (conjunctive)

- Any Low on Legal, Fiscal, or Administrative → Overall Portability = Low
- Overall High requires all three $\geq$ Partial, with at least two = High

Rationale

Prevents “fragile transfer” where a design looks good on paper but fails on enactment because one necessary precondition is missing

Worked example:

Compensation

(TFETP vs UK STPCD)

- **Design specificity**
 - TFETP: Salary bands and benefits are published, with levels by qualification/experience—progression rules referenced at a high level, with fewer clause-level details on increments and thresholds.
 - UK STPCD: Paragraph-level scales and allowances codified with precise pay ranges, progression criteria, and conditions for TLR/allowances.
- **Enforceability**
 - TFETP: Entitlements stated on public pages; formal grievance, appeal bodies, and timelines are not detailed on those pages.
 - UK STPCD: Statutory process includes prescribed pay decisions, appeals routes, and governance duties, providing strong enforceability.

	High enforceability	Lower enforceability
High specificity	UK STPCD - Statutory pay ranges and increments - TLR/allowances codified - Defined appeals routes	-----
Lower specificity	-----	TFETP (public pages) - Salary bands published; progression referenced - Fewer clause-level details on increments - Grievance/appeal timelines not detailed on portal

What “High alignment” means ? (rubric anchors)

- **Eligibility, amounts, duration, and renewal are fully specified in writing**
 - Who qualifies, how much, how long, and on what renewal criteria
- **Named authority and responsible unit**
 - Which office issues, verifies, pays, and oversees compliance
- **Claims pathways and timelines are public**
 - Steps, documents, deadlines, appeal routes, and service standards
- **Publication on an official channel**
 - Clause or circular is publicly posted and date-stamped

20-row sample of coded clauses (abbrev.)

ID	Lever	Clause summary	Source and para	Alignment	Portability (L/F/A)
R1	Compensation	Base pay bands by qual. and years	TFETP Benefits page, salary bands[1]	High	High/High/High
R2	Compensation	Annual increment rules	TFETP Benefits page, progression[1]	Partial	High/Partial/High
R3	Bonuses	Year-end bonus tied to performance	MOE press release 2024[2]	Partial	High/Partial/Partial
R4	Relocation	Economy airfare reimbursement incl. one dependent	MOE press release 2024[2]	High	High/High/High
R5	Relocation	Housing reimbursement cap	TFETP Benefits page[1]	Partial	High/Partial/High
R6	Workload pay	Overtime for extra instructional periods	TFETP Benefits page[1]	Partial	High/Partial/Partial
R7	Insurance	Health and labor insurance coverage	MOE press release 2024[2]	High	High/High/High

Practical implications for policymakers

01. Explicitly codify induction

- Define duration (e.g., first 12 months), mentor ratio (e.g., 1:1 or 1:2), protected time (e.g., -2 periods/week), funding source and unit responsible
- Specify deliverables: induction plan, observation cycles, formative reviews, completion certificate.

02. Write hard-to-staff differentials into policy

- Add written differentials for rural/remote, shortage subjects, multilingual placements
- Include eligibility, amounts or ranges, duration, renewal criteria, and sunset/impact review clause

03. Publish grievance and audit processes timelines

- Name the appeal body, steps, required documents, decision timelines, and escalation path
- Commit to periodic audits and publish redress statistics (counts, closure times)

03. Report fidelity and retention metrics periodically

- Release annual dashboards: vacancy rates, placement mix, induction completion, grievance outcomes, 1- and 3-year retention by context
- Provide machine-readable tables and a documentation note on methods and cut-off dates.

examples

- **Induction clause template:**

“Beginning teachers receive a 12-month induction with a 1:1 mentor, –2 periods/week release, funded by MOE K-12 EA; school submits an induction plan within 30 days of appointment.”

- **Hard-to-staff differential:**

“Add NT\$X–Y monthly for designated rural or shortage-subject placements; eligibility by published school list; reviewed annually; renewal contingent on assignment persistence.”

- **Grievance timeline:**

“Claims acknowledged in 7 days, adjudicated in 30; appeal to Committee Z within 14; quarterly audit summary published.”

- **Metrics commitment:**

“Publish annual retention by cohort and context; induction completion rates; grievance volume and median closure time; methodology appendix and CSV.”

Limitations and scope

- **Public documents only; no internal outcome data**
- **Not an outcomes evaluation; design appraisal**
- **Status as of early 2025; subject to change**

Result : Artefacts produced

- **TFETP–international matrix**
